EXPERIENCE - 1 YEAR

React JS Developer

Social Swirl

I'm a frontend developer at Social Swirl, focusing on creating visually appealing web applications. My role includes designing captivating user interfaces and seamlessly integrating them with the backend through APIs.

PROJECTS

ELISHA

Ecommerce

Visual Studio

I've successfully completed the Elisha shopping brand project, utilizing ReactJS and Redux Toolkit for an optimized experience. Bootstrap was employed for sleek styling, ensuring a responsive design.

LOJA

Ecommerce

Visual Studio

Recently wrapped up another project, 'LOJA,' a brand e-commerce site selling dresses. Developed with ReactJS, Redux Toolkit, and integrated with a REST API for functionality.

SOCIAL SWIRL LMS

LMS

Visual Studio

Just finished a Learning Management System (LMS) project for Social Swirl. Built with ReactJS and Redux Toolkit, it empowers the company to offer courses and skills to students.

EDUCATION

Virtual Universtiry

BSCS

2019-2023

Al-Noorian College

Amir Road Shadbagh Ihr

2017-2019

STRENGTHS & SKILLS

- ✓ React JS
- ✓ Redux Toolkit
- ✓ JavaScript
- ✓ Tailwind CSS
- ✓ Bootstrap
- ✓ CSS 3
- ✓ HTML5
- ✓ Responsive Designs
- ✓ Rest API
- ✓ NODE JS

PORTFOLIO

<https://github.com/CodeWithSuheer/suheer>

SKILLS

- ✓ Design Thinking
- ✓ Results-Oriented
- ✓ Time Management
- ✓ Strong Communication
- ✓ Problem-Solving

PROJECTS

ELISHA

Ecommerce

REACT JS, REDUX TOOLKIT, NODE JS, EXPRESS, MONGODB

I've been immersed in a project called Elisha, where I took on the role of a frontend developer. Working with React JS and the Redux toolkit has been my forte, while I've polished the project's appearance with Bootstrap for styling. On the backend front, my talented colleagues have crafted it using Node JS and Express, with MongoDB as our trusted database.

LOJA

Ecommerce

REACT JS, REDUX TOOLKIT, NODE JS, EXPRESS, MONGODB

Diving into LOJA, the vibrant e-commerce haven for all things fashion! Here, my role as a frontend developer is like crafting the storefront of a fashionista's dreams. Armed with React JS and the Redux toolkit, I've tailored the digital experience, adding a touch of Tailwind for that chic and stylish flair

LMS

Learning Management System

<https://socialswirl.tech>

REACT JS, REDUX TOOLKIT, TAILWIND CSS, NODE JS, EXPRESS, POSTGRES

In the project of Learning Management Systems, I played a key role as a frontend developer. Using React JS, the Redux toolkit, and a bit of Tailwind CSS, my goal was to make it look good and work smoothly for users.

On the technical side, we used Node JS and Postgres for the backend. One cool thing we did was give admins the ability to easily add and update courses. This way, the platform could adapt to changing educational needs without a fuss.

PICK & DROP APP

Pick & Drop App

University Final Year Project

REACT NATIVE, REDUX TOOLKIT, CSS , PHP, SQL DATABASE

In this pick & drop app, I single-handedly handled the development of both the frontend and backend. Using React Native, I crafted the user interface and experience, implementing Redux Toolkit for efficient state management.
